

Please leave our no call list alone. If I am a past customer of a company, they can send me information on new products or updates through the US Mail or by E-mail if I wish to here from them not if 2,000 or more companies want to send me junk and/or solicitate money. I used to receive up to fifteen phone calls a day, mostly wanting me to donate money (and who knows if they are ligitimate) or buy something. I have newspapers, flyers, mail, E-mail, TV, radio, catalogs etc. that I have requested, from which to learn about and buy new things or reputable charities to which I can donate money. I do not need nor desire to have unwanted solicitations constantly using up the precious time I have, nor do I wish it on any of my neighbors, family and friends, especially pressure on the elderly and ill who often cannot make good sound financial and business decisions and often fall prey to scam artists, often losing hundreds and thousands of dollars. Don't ruin our rights to privacy and protection from these companies. In fact, I cannot imagine why any other state wouldn't want the same protection we have. Take some votes or surveys from the people in each state and see what they think! Sincerely and patriotically,  
Mrs. Dareen Schott
